

July 2, 2010

Dear Business Associate:

The Environmental Protection Agency (EPA) has issued a Test Order for Toluene under the Endocrine Disruptor Screening Program pursuant to sections 408(p)(3) and (5) of the Federal Food, Drug and Cosmetic Act (FFDCA). This order is specific to Toluene used in the formulation of a pesticide product. Conchemco, LTD. has selected to opt out of the testing program by not offering its Toluene for use in pesticide formulations.

The decision to-opt out of this order has implications on all future purchases of Toluene from Conchemco, LTD. For this reason, Conchemco requests that you read the statement below. If your company can comply, please have an authorized officer sign and date this letter acknowledging compliance. This document will be effective for all remaining shipments in 2010. If your company has created their own document that indicates they will not sell into this market, please feel free to return that document with the appropriate signature(s). If your company cannot comply and sign this letter, please let us know immediately as it will impact our ability to supply Toluene to your company in the future.

Thank you for your assistance. **Please return by July 31, 2010**, a signed copy to Jennifer Carlisle by fax OR email: (972) 248-2152 or Jennifer@conchemco.com. If you have any questions, please do not hesitate to call.

Please sign below to indicate that you will comply with the following statement:

"Buyer shall not use this substance in the formulation of a pesticide product, or sell or distribute this substance to any person the buyer knows or reasonably should know intends to use this substance in the formulation of a pesticide product, as of August 25, 2010."

Best Regards,
Jennifer Carlisle
EH&S Code Coordinator
